# LAUFEN

Bathroom Culture since 1892 🖪 www.laufen.com

Room for indulgence: **ILBAGNOALESSI One** is a modern classic; its poetic, sensual design brings emotional depth to your bath-room. A creation of the prolific Italian designer, Stefano Giovannoni. p. 16

Perfectly balanced: **ILBAGNOALESSI dOt** sets the scene for purist bathing. The understated geometrical shapes of the bath lend an air of peace and relaxation. p. 40

Fingerprint of nature: The **PALOMBA COLLECTION** was designed with nature as its inspiration. Its natural forms combine effortlessly to create a harmonious order. p. 44

Kartell and LAUFEN are together launching an integrated and complete bathroom project called **Kartell by LAUFEN.** p. 70

With **living**, LAUFEN presents bathrooms that are as multifaceted as life itself and designed for modern living: each of the four living models blend harmoniously into various lifestyles. p. 90

With **Lb3**, decoration is allowed: A home is not a snapshot of a moment but reflects the diversity of the householder's life, ideas and possessions. LAUFEN provides a matching bathroom design. p. 116

Elegant bathroom classic: **moderna plus** is a comprehensive high-quality bathroom range. The timeless and harmonious language of the forms gently takes this to a modern level. p. 126

A timeless classic, designed for the future: **palace** has become a versatile and comprehensive bathroom. palace is equally at home in private bathrooms and hotel bathrooms around the world. p. 134

Democratic design: **LAUFEN pro** applies the design principle less is more: elegant, functional and extremely flexible – as well as attractively priced. p. 148

The price list of your LAUFEN/ROCA subsidiary is the most accurate reference point for product availability. Delivery periods may also differ.

# Making the bathroom a living environment

The personality of this highly traditional Swiss brand reflects a symbiosis of design, quality and functionality. LAUFEN, the premium brand under the ROCA umbrella, is one of the world's leading manufacturers with a global distribution network.

The company's core competence is its knowledge in the area of sanitary ware manufacturing. Over 120 years, the LAUFEN brand has been using the oldest malleable material known to man to make innovative sanitary products in state-of-the-art plants with legendary Swiss precision. Knowledge of the bathroom as a whole developed from the competence of LAUFEN in ceramics manufacturing, and sophisticated design.

What makes LAUFEN products unique at the first glance is that their Swiss design unites two major design trends: emotional Italian design from the south and the northern tradition of design precision and clarity. For LAUFEN, quality has two aspects: manufacturing knowledge and high degree of practical benefit that the finished bathroom affords the customer – which is often not immediately apparent. LAUFEN, a Swiss company manufacturing products that allow water, a precious resource, to be used sparingly, demonstrates in this manner a commitment to preserving natural resources and environmentally-friendly production.

# From local foundations to a global player

When the company, LAUFEN, was founded in Switzerland in 1892, sanitary conditions were well below today's standards and level of convenience standards to which LAUFEN, the only sanitary porcelain manufacturer producing exclusively in Europe, contributed. The history of some of the company's production sites goes back even further in time. Around 1878, the pioneer of the mechanised production of sanitary ceramics was a factory belonging to the Austrian monarchy. Not only tradition, but also the well-established situation of the various European manufacturing sites in their home markets of Switzerland, Austria and the Czech Republic, have helped lav the secure foundations of LAUFEN quality. The aim of LAUFEN back then and also today is to be a leader in technology, service and design. As early as the 1980s, the most efficient injection moulding technology in the field of ceramics processing was invented in Switzerland by LAUFEN, a breakthrough that constituted a lasting contribution to industrial production. Just as important for LAUFEN are the continuing developments in the field of design: Wallmounted toilets and floorstanding washbasins, for instance, have made a new aesthetic possible.

LAUFEN has now widened its expertise and its portfolio of sanitary ware, bathtubs, furniture and accessories by adding faucets to the product range. In 1854, Charles Kugler founded a small company for brass products in Lausanne. The first water and gas valves in Switzerland were produced here in 1863. Faucets have been manufactured at the Laufen site since 2009.

# **Global network with local service**

LAUFEN has its headquarters in Laufen near Basel in Switzerland. There are four more production sites in Austria and the Czech Republic. Steeped in tradition yet ultra-modern; these production plants make over 3 million sanitary ware products annually and distribute these via a worldwide network of retail outlets and sales partners. Since 1999, LAUFEN has been one of the world's largest bathroom manufacturers in the Spanish Roca Group, which has 20,000 employees in over 135 countries and produces 38 million ceramic products annually. Similor Group AG, one of the leading companies in the production of faucets with a manufacturing tradition which goes back more than 150 years, has belonged to the group since 2007.

# **Production sites in Central Europe**

- 1 The company is named after the town of Laufen near Basel in Switzerland where it has produced washbasins, bidets and toilets in sanitary ceramic for 120 years. The management of LAUFEN Bathrooms AG, faucet production, training centre and the LAUFEN Forum are also located here.
- 2 The production facility in Gmunden specialises in the manufacture of highly sophisticated bathroom sanitary wares. The Gmunden facility has acquired this expertise through a long tradition in ceramics production.
- 3 The LAUFEN factory in Wilhelmsburg, Austria has a long tradition of ceramics manufacturing. A factory for English stoneware was founded here as early as 1795. Today, this state-of-the art factory practises the fine art of sanitary ware production.
- 4 The state-of-the art factory in Znojmo, in the Czech Republic, produces high quality bathroom sanitary wares. This factory has a long tradition which goes back more than 130 years.
- 5 Bechyně is not only the home of the oldest vocational school of ceramics in the Czech Republic, it is also an ultra-modern factory where high quality ceramics have been produced for more than 50 years.

***	

6 LAUFEN ceramics products are produced in accordance with strict LAUFEN quality standards (LQS) at the state-of-the-art Roca Group factory in Gliwice. In addition, LAUFEN bathtubs are made of acrylic and mineral cast materials in Gryfice, Poland.

# The LAUFEN Forum

A powerfully symbolic building stands in the Laufen valley in the canton of Baselland: the LAUFEN Forum, an architectural statement that reflects the brand and is consecrated to the bathroom. Here, LAUFEN, the largest Swiss manufacturer of bathroom fittings and internationally renowned company, celebrates its product – which today is much more than just a sanitary ware; it is the bathroom as a complete package.

With the Forum, LAUFEN has created a new architectural setting for its products: it is a comprehensive architectural statement in concrete with the bathroom at its centre and acknowledges Switzerland unequivocally as the company's headquarters and production site. A space for the bathroom with the power to inspire clients, architects, retailers and tradesmen alike and provide a source of information.

This is also the home of the training centre of LAUFEN Bathrooms AG. A wide range of seminars is held here to train groups and communicate product knowledge. Training sessions also take place in the Sky Gallery in Wilhelmsburg, Austria, and in Znojmo in the Czech Republic.

LAUFEN won the "Award for Marketing + Architecture" in the category "Office and commercial buildings - industrial and commercial interiors" in 2010. It also won the Green Good Design Award and, in 2011, the "best architects award 2011" in the category "Business and Industrial Buildings".

# **Outstanding design**

Although exquisite craftsmanship has always been a trademark of LAUFEN products, a great deal of thought goes into their design too. For several decades now, LAUFEN has had positive experience of the successful collaboration with outstanding architects and designers. In the development of new bathroom suite concepts, the expectations of the designer are met by the experience and precision of modellers, product developers and engineers. The shared objective: to shape the elegant materials as intelligently and pragmatically as possible while maximising their aesthetic appeal, minimising the impact on the environment while using resources as sparingly as possible. The company's product range is further enhanced by innovative material developments through the production of a near white porcelain body that allows smaller radii and a slimmer appearance. This interplay of creative design concepts and a precise manufacturing process using state-of-the-art technology facilitates an approach to the bathroom as an environment - an intelligent composition of the sum of its parts. The result: a highly functional and aesthetic product range. From ceramic sanitary ware, through to faucets, bathroom furniture and mirrors, to shower trays, bathtubs and whirl systems - in all price categories. At the same time, we use our knowledge and experience to achieve a high degree of individuality, in line with the wishes of our customers. As well as additional colours, surface finishes and motifs, made-to-measure washbasins that can be cut to the required size are possible, also with short delivery times.

# Sustainable quality

LAUFEN manufactures products that allow water, a precious resource, to be used sparingly and therefore demonstrates its commitment to preserving natural resources. It therefore places priority on environmentally-friendly production, using energy and raw materials sparingly at all levels of production - from development to marketing. For example, LAUFEN reuses heat generated in the production process to dry the sanitary ware. In Austria, LAUFEN was awarded the "EMAS Environment Prize 2007" for its exemplary environmental management. The Swiss factory in Laufen has carried the label of the Swiss Energy Agency for Industry (EnAW) since 2006, which recognises it as a company which is actively committed to voluntary climate protection. LAUFEN also actively looks for environmentallyfriendly solutions for many of its products. Thus the new SaphirKeramik is perceptibly sturdier and has greater flexural strength. LAUFEN can use a thinner ceramic body and a simpler structure to reduce the weight compared with conventional ceramic. The benefits are manifold: lower raw material and energy consumption in production and transportation. LAUFEN, however, also places a great deal of emphasis on making products of outstanding quality - as numerous internationally-recognised product certificates and standards testify. The Swiss Q-Plus symbol certifies compliance of our products with the European standard and the established more exacting Swiss standard. This is an important aspect for LAUFEN, as only durable, low-wear products deserve to be called environmentally-friendly - after all, avoidance comes before recycling. LAUFEN thus helps customers to live in harmony with the environment and reduce energy costs. Our products therefore also feature the latest energy and water-saving technologies, such as the newest generation of water-saving WCs: several LAUFEN toilets flush using an optional 4.5 or 3 litres dual flush system as opposed to 6 or 3 litres conventional WCs. We also have particularly efficient urinals that require no more than 1 litre of water for flushing.

LAUFEN's 4.5/3-litre toilets meet all functional requirements defined by international standards EN 997 Class 1 Type 5, EN 997 Class 2 and SAI/Wels 4 Stars. Please take into consideration your local requirements.

The first two LAUFEN production facilities were successfully ISO 14001 certified and EMAS registered in 1997. Both of these factories were awarded the European Environment Prize 2007 for exemplary environmental management.

All the LAUFEN production facilities are now certified with the Environmental and Quality Management Systems ISO 9001 and ISO 14001.

Since 1998, LAUFEN has continually monitored the use of resources in all its internal and external processes. Targeted measures and appropriate investments promote the efficient and sustainable use of manufacturing resources. Important key environmental protection indicators now clearly show that LAUFEN production sites fulfil the legally-prescribed environmental protection standards, and in most cases also exceed them.

Products with the Q-Plus certification meet both the European standard and the established more stringent Swiss suissetec/VSA standard. LAUFEN sanitary ware products meet these Swiss quality standards and have been recommended for approval accordingly.

The architect and designer, Stefano Giovannoni, born 1954 in La Spezia (Italy), lives and works in Milan. His work has received international acclaim. A number of his designs can be found in the permanent collections of the Centre Georges Pompidou in Paris and the Museum of Modern Art in New York. According to Alberto Alessi, the Managing Director of ALESSI, Giovannoni is one of the few designers who understands how to combine the unusual with the popular, which is also why he was commissioned to develop the first complete bathroom scenario for ALESSI.

The iconic washbasin from the collection is also available as a countertop washbasin in 90 cm and 120 cm, righthand and left-hand versions, particularly suitable for smaller rooms.

A free-standing bathtub made from solid surface in a gentle, comfortable shape with or without whirl system. Also as a fitted version.

The collection is complemented by new accessories of functional and symbolic value, including a shelf with integrated towel holder, made from revolutionary SaphirKeramik. Toilet roll holders and clothes hanger are also available.

The playful, slightly eccentric form of the washbasins is quite iconic and fires the imagination without compromising functionality. The wide variety of ILBAGNOALESSI One washbasins demonstrates that good design can take more than one shape. From the small washbasin to the countertop washbasins, the character of the range is unmistakable. Most washbasins have a concealed ceramic overflow system. The ceramic of the washbasins is finished with LAUFEN Clean Coat, making it particularly easy to clean.

The sanitary ware with its poetic design language was created by the prolific Italian designer, Stefano Giovannoni. ILBAGNOALESSI One includes not only the characteristic and spectacular washbasins, but also an aesthetically-pleasing high-quality and functional range of furniture, bathtubs made of solid surface and sanitary acrylic as well as accessories made from SaphirKeramik.

An icon of contemporary design: the floor-mounted TamTam by LAUFEN opens up new dimensions in bathroom design. The taps, mounted on the rim of the basin, wall-mounted or floor-standing, combine perfectly with the washbasin. Behind this lies an exceptionally high degree of functionality: invisible overflow, concealed connection hoses, hidden mounting.

The surfaces are top-quality Noce Canaletto real wood veneer or white high-gloss lacquer with a quartz cover plate. It goes without saying of course that all surface finishes are not sensitive to water.

## ILBAGNO**ALESSI dO**t

ILBAGNOALESSI dOt – a cooperation between Alessi, LAUFEN Bathrooms and Oras – is the first bathroom project of the designer, Wiel Arets.

In drawing up the design, Arets paid particular attention to ensuring that the individual objects did not distract from the real purpose of the bathroom – to cleanse the body and spirit. Wiel Arets: "The ensemble as a whole is based on the strengths of its individual parts. Each must fulfil its purpose without becoming overly dominant. All objects must, in all respects, serve the purpose of relaxation. The design of the forms is very low key yet consistent for all objects which means they project an overall impression of peace and tranquillity. On closer inspection, it can also be seen that their form perfectly follows their function."

While the designs of the Dutch architect and designer Wiel Arets are undoubtedly based on intellectual concepts, they are also pragmatic. His most significant work includes the Academy of Art and Architecture in Maastricht and the AZL Pensions Fund Headquarters in Heerlen, Netherlands. Wiel Arets was born in 1955 in Heerlen and received his diploma from the Technical University of Eindhoven in 1983. In 1984, he founded the office Wiel Arets Architect & Associates in Heerlen, which subsequently moved to Maastricht in 1996. He has lectured all over the world at academies and universities in London, Vienna and New York and other cities. He currently holds the Berlage professorship at the Technical University of Delft.

Formal and minimalistic: this is the impression created by the elements of ILBAGNOALESSI dOt. The unifying key element is the circle – even if this is not always obvious.

The highly minimalist design with closed form and low-key elegance radiates an air of tranquillity.

With the introduction of the successful LAUFEN PALOMBA COLLECTION in 2005 the famous Italian designers Ludovica and Roberto Palomba created a design language that the couple describe as a "fingerprint of nature". The tension between rigorous geometrical and organic shapes is typical of the entire collection, and ensures that all elements can be combined with one another. If recent editions have favoured geometrical shapes, this time round the Milanese designers are again focusing more on soft organic lines. The highlights of the PALOMBA COLLECTION are the "Menhir" washbasin and an exceptional bathtub. These two leading protagonists are accompanied by a cast of four countertop washbasins, two washbasin bowls and a new bathroom furniture collection.

reddot design award winner 2007

DESIGN PLUS

The two asymmetrical washbasin bowls in the PALOMBA COLLECTION are also organic by nature. The  $520 \times 380$  mm bowl is suitable for freestanding faucets and wall outlets with no faucet ledge of their own. On the other hand, the  $600 \times 400$  mm bowl has a faucet ledge, and can thus accommodate a standard faucet.

LAUFEN extends its range of washbasins introduced in previous editions of the collection by four countertop washbasins in 50, 65, 80 and 100 cm lengths. An organically shaped bowl blends lagoon-like into the ultra-flat washbasin panel. The central position of the bowl leaves ample storage space at either side.

To match the ceramic washbasin LAUFEN has created a bathroom furniture series for the PALOMBA COLLECTION. It includes vanity units whose handles and bases can be optionally selected with atmospheric LED lighting, a tall cabinet, medium cabinet and washtops

Innovative axialities: organic decisive lines for a large washbasin that characterize and shape the entire range of architectural objects. A unique product in the world of sanitary wares which poses a real challenge to the laws of production. This iconic 1600 mm washbasin is also available in widths of 1200 mm and 800 mm. Together with the asymmetric washbasin bowl, this washbasin won the coveted red dot design award.

The PALOMBA COLLECTION offers endless creative possibilities as many of the objects can be combined. LAUFEN has set itself the task of continuously adding new design solutions to the PALOMBA COLLECTION. The versatile design tonalities give architects, interior decorators and designers a wide selection of current superior quality products at their disposal in the planning of bathrooms thus offering them a big opportunity: to break free from all clichés and have full design freedom.

The bathroom is also architecture. This room can become a real part of the home by devising bathtub, washbasin, WC, bidet and furniture configurations. The WC and bidet in white ceramic are available as a floorstanding bidet/WC, wall-hung bidet/WC and WC with cistern. The toilet seat has a lowering system. The WC seat with ultra-flat cover fits existing stylish WC versions.

The dynamic asymmetrical geometry and high back of the freestanding bathtub recalls a natural water basin washed out of the rocks over the millennia. These natural lines moulded to the contours of the body also promise bathing enjoyment which can be intensified by light and whirl massage functions.

Symmetrical bathtubs are available as freestanding or built-in versions with 40 mm or 200 mm borders. A built-in version of the large asymmetrical bathtub with extremely flat 20 mm and 80 mm border is available. Owing to its form and generous dimensions, it is reminiscent of a small lake in which you can immerse yourself, relax and renew your energy.

## Kartell ◎LAUFEN

Kartell and LAUFEN are together launching an integrated and complete bathroom project. A codesigned project nurtured by the intense dialogue between the enlightened customer on the one hand the award winning designers Ludovica+Roberto Palomba on the other, who have earned themselves the merit of having reinvented the concept of the bathroom.

The vitreous transparency of latest generation polycarbonate and the sheer edges of the totemic freestanding washbasins attract those that love minimal, refined white environments.

# **living**city

A system with corners and edges, yet so flexible and easy to maintain: living city has a clear concept and clear forms. Thanks to the modular system, washbasins with and without storage are available in many widths. Reduction, not stone cold sobriety; individualism without idiosyncrasy: The language of the living city forms is aimed at people who live in modern surroundings and create a living environment with refined awareness and sensitivity to materials. The design of LAUFEN rectangular wall-hung WCs and bidets suits this context perfectly.

Urbane and modern: living city demonstrates a bold tendency towards reduction and interprets sanitary ware as a cube. This bathroom design is characterised by a clear line and aesthetic sophistication. Pure geometry: The sanitary ware products of living city speak a clear formal language are a celebration of modern lines - and are also eyecatching in combination with the matching city line, citypro and cityprime faucets. Case, the bathroom furniture series, is the perfect compliment and provides more storage space for all living city washbasins (see chapter "case").

Individual touch: The ceramic shelf of the living city asymmetrical washbasins can be customised using eight different decors. Decoration can also be applied to smaller quantities of these washbasins according to individual requirements (more details are provided later on this chapter).

Individual touch: the ceramic shelf can be modified according individual requirements using different decors or designed according to personal requirements in smaller quantities.

# living city

# living city

# case for living city

# living square

### Design: platinumdesign, Andreas Dimitriadis

living square pushes the art of ceramic manufacturing to its limits. The extremely flat washbasin, with its flat surfaces and defined edges, appears to float in front of the wall. This is how elegant sanitary ware can be. living square inspires with its slender outline: The double washbasin, with a useful width of 180 cm in combination with the ceramic shelf, creates a fully functional washing facility. The case range of furniture is equally well matched (for more information see the chapter "case").

Different configurations are possible for the living square washbasin: traditional wall mounting; incorporated in a furniture unit; as a back-to-wall washbasin bowl; recessed into the top of a countertop or with additional practical towel holder.

The living square washbasins are cutable and can be trimmed to almost any requirement: on the right, left or at both ends. Thanks to precision engineering, they can be cut in our factory to within a millimetre of customer specifications. This means we can produce tailor-made solutions that fit perfectly into niches and corners.

living square can demonstrate its qualities in hotels too: with useful accessories such as an integrated towel holder or open vanity unit with tissue box. The furniture unit, available in many surface finishes, emphasises the filigree line of the sanitary ware and can also be used in this case to provide accents in black.

# living square

# case for living square

# living square

## SaphirKeramik

LAUFEN really makes the most of the advantages of the SaphirKeramik material: New possibilities and flexibility regarding the modelling of ceramic can now be seen clearly in the delicate, thin-walled shapes and narrow radii of the living square bowls.

To complement the revolutionary living square bowls, LAUFEN offers simple yet elegant furniture which shows off the delicate bowls in the right light. The floor-standing furniture units are connected to the wall and available in two sizes to suit all of the washbasin bowls.

# living style

Greetings from the avant-garde: living style is a washbasin that consistently emphasises the horizontal – from sanitary ware through to the towel rail. Aesthetic perfection, from every angle: this washbasin – single or double version – celebrates the lightness of being. A classic that brings together design and sanitary ware competence.

## living style

# living

#### Design: Phoenix Design

#### WC & bidet

Round or square: The WC and bidet models in the living series leave nothing to be desired. Hygienic LCC special glaze, WC seats with lowering system and always with economy-flush capability.

## living

For information on ceramic colours and options, refer to the overview at the end of the catalogue.

Life's too short for one style only. Being at home is much more stimulating than the finely decorated rooms in the glossy magazines would have you believe. And what's more: A home is not a snapshot of a moment but reflects the diversity of the householder's experiences, ideas and accumulated possessions. LAUFEN has the bathroom concept for living: Lb3. No off-the-shelf style please! Life is full of choices – and we can also choose how we bathe. With Lb3, LAUFEN offers the freedom to continually reconfigure your environment.

The Milan architects, Ludovica+Roberto Palomba, researched living "in the here and now" for a whole year – in many large cities of the world. The insights are fascinating and have been implemented in Lb3. Down with the dictates of style – long live free interpretation and improvisation! With the modern, classic and design versions Lb3 provides the right platform for this.

Perfect combination with contemporary furnishings: Lb3 classic is the formal language of the middle-class living environments of the 19th century - adapted to the present day and uncapricious. The double contour lends the washbasin a timelessly elegant and light appearance. As washbasin with pedestal or siphon cover, as cutable countertop washbasin or as built-in washbasin - Lb3 classic offers a wide selection that gives you ultimate flexibility when choosing your fixtures and fittings. This range offers a nod to the past - yet is still highly contemporary in terms of its design: furniture in white, oak or wenge. For wall-mounting or flexible installation on chrome-plated metal feet. Tall cabinets with glass shelves can store a great deal ensure the bathroom stays tidy. Perfection down to the last detail: The accessories are perfectly matched to the design of the three Lb3 versions and have sophisticated chrome fittings.

Remarkably flat: The shower tray in sanitary acrylic has more or less no border. It is only 15 mm deep – optimum for solutions that are either installed flat on top of the floor or are recessed flush with the floor. Lb3 shower trays and Lb3 bathtubs have a concealed drain: this not only makes them comfortable to stand and sit in, but also easy to clean.

Lb3 bathtubs, made of high quality sanitary acrylic, are available as fitted or free-standing tubs with panels in natural wood veneer (white, oak, wenge). There are also practical details such as a step-in aid with rail, an innovative selfadhesive and waterproof gel pillow and the faucet bank integrated into the edge of the tub. The bathtubs are suitable for all three Lb3 design versions and are of course also available with whirl system.

## Lb<sup>3</sup> comfort

Lb3 Comfort WCs – for greater comfort: The seat position is 6 cm higher which makes it considerably easier to sit down, allows a more ergonomic sitting position and lets you stand up more easily. It fits existing connections, which makes replacement clean and easy.

- seating position raised by
   6 cm for more comfort
- knee angle of about 90° for ergonomic sitting position and ease of sitting and standing
- easy installation due to standard fixing dimensions (e.g. for renovation)

Whether floorstanding or wall-hung, whether with face mounted or recessed cistern: the Lb3 WC and bidet range is convincing due to its variety – with or without lowering system. In the classic variant, the double contour is applied to the WC lid, and is kept simple in the modern and design versions. The WC and bidet sanitary ware range is the same for all Lb3 versions. Many convincing practical details: bidet overflow without overflow hole and concealed fixings for WC and bidet.

## **moderna**plus

The central form of moderna plus is the trapezium and was developed by Peter Wirz at Vetica. The company, which has won many awards for its work and has offices in Zurich, Lucerne and Taipei, specialises in product design and has already collaborated several times with LAUFEN.

Harmony as a concept. moderna plus is a high quality comprehensive range. All the individual parts combine to form an aesthetically and functionally pleasing whole. The range includes sanitary ware as well as practical ceramic shelving which achieves a harmonious and homogenous installation.

The basic geometric form of the trapezium is a stylistic and functional element which remains constant throughout the entire collection. The clear language of the moderna plus washbasin forms, and their varying sizes means they can easily be combined. This means that, whatever the requirement, an appropriate solution can always be found.

A timeless classic, conceived with the future in mind: palace has developed into a complete multi-facetted bathroom solution. But its speciality remains: To provide cutable washbasins tailored to the measurements of any bathroom.

Palace's designer, Andreas Dimitriadis of platinumdesign, has put together a bathroom range that is as suitable for the private home as it is for the hotel bathrooms of the world. It is a homage to the ceramic material, taking advantage of its strengths in both applications.

The series of bathroom furniture in the case range perfectly matches the palace range (for more information, see the chapter "case" under in "Bathroom furniture" section).

A number of handy details make palace the ideal bathroom solution. For example: An optional soap dispenser on the washbasin. A hygienic solution, also suitable for the private bathroom. Or the open storage areas provided by the easy-to-clean ceramic shelf under the washbasin.

The large palace washbasins (from a length of 120 cm) can be ordered made-to-measure from our factory. Thanks to our innovative production engineering, our sanitary ware fits precisely into bathroom plans. The sanitary ware can be cut, also diagonally. Freestanding side components can also be manufactured to precise measurements without having to add on side panels with visible joints.

Whether wall-mounted or freestanding – the range of palace WC and bidet models covers all applications. Ingenious: An ergonomic form with concealed mountings. An optional WC seat with lowering system is also available.

# laufenpro

LAUFEN has extended its successful LAUFEN pro bathroom range, and updated its design. It has enhanced this already comprehensive bathroom range, which offers the ideal solution for every spatial situation and requirement and also reflects the building values of the current generation.

Industrial design is the modern answer to the once revolutionary idea that everyone has a right to enjoy beautiful forms. Good design is now no longer a right reserved for the most affluent customers. Modern methods of industrial production and designers such as Peter Wirz of Vetica, who put optimum manufacturing feasibility at the forefront of their creative processes, make such sanitary ware ranges as LAUFEN pro possible. This does not just benefit the designer, more importantly, it also benefits the customer.

## laufenpro S

Slim, light and bold – LAUFEN pro S is the new member of the successful LAUFEN pro series. Thanks to the delicate redesign, the elegant pro S is compatible with all pro variants.

The Swiss designer Peter Wirz is responsible for LAUFEN pro S. With heaps of sensitivity, he brought about a systematic, production-optimised evolution of the pro concept: Thanks to its slim silhouette and clearly-defined radii, the washbasin has a light and elegant appearance. The deep bowl means that it's also functionally appealing. The aesthetics of LAUFEN pro S therefore definitely take the range in the direction of LAUFEN's premium design lines – while remaining affordable by all.

If space is scarce, good ideas are required. LAUFEN pro compact solutions give you the opportunity to devise a comprehensive design concept, even in the most restricted spaces. Our washbasins and WCs have a short projection which saves valuable space.

The new LAUFEN pro S WC is a geometric wall-hung WC which comes with a matching bidet. It fits in perfectly with the redesign of the LAUFEN pro S washbasins. Thanks to the concealed LAUFEN EasyFit mounting system (PCT pat. pend.), the ceramics have a flawless appearance and are easy to clean.

The elegant and dainty LAUFEN pro S furnituremounted washbasins with deep, highly functional bowls and generously sized shelves are new to the range. These are only available together in a pack with the matching furniture in the range.

The LAUFEN pro S range contains practical furniture with highquality details such as integrated handles and gently closing drawers with no siphon cut-out. Available in white glossy, white matt, wenge, graphite and 38 special colours.

For information on ceramic colours and options, refer to the overview at the end of the catalogue.

# laufenpro B

Elegance and function combined. Semicircular washbasins in a large number of sizes. Suitable for any type of use. Pro as in professional – B for Basic.

The elegant shape is striking, as well as the raised rim in the LAUFEN pro B series. This is a washbasin which makes a good impression everywhere. It is thus logical that it is available in a large range of sizes and styles.

## laufenpro A

Reduction as design principle. Simple, no-nonsense rectangular washbasins. Pro as in professional – A for Architecture. A simple rectangle is the basic shape, and the special rim that prevents overflow is a design feature that is also functional.

# laufenpro

The WCs and bidets in the LAUFEN pro range are suitable for all applications – most of which are equipped with an economical 4.5/3-litre flushing system.

Thanks to the concealed LAUFEN EasyFit mounting system (PCT pat. pend.), the ceramics have a flawless appearance and are easy to clean.

## laufenpro rimless wc

The bowl of the new LAUFEN pro rimless WC has no rim. There's no longer anywhere for dirt and deposits to hide; instead, thanks to an innovative and powerful flushing system, everything's flushed cleanly away with both 6/3 litre and the 4.5/3 litre cistern. Both public toilets and private bathrooms can benefit from the easy cleaning and great hygiene of this system.

Wall-hung WC and bidet with 560 mm projection. Universal WC paper and brush holders in ceramic are also available.

Compact dimension, maximum comfort: WC with 490 mm projection.

Back-to-wall and floorstanding WC and bidet.

Renovation-friendly WC with comfort and normal sitting position and vertical outlet.

Back-to-wall floorstanding WC combination with universal seat and cover.

Renovation-friendly WC with comfort and normal sitting position and horizontal outlet.

#### Bathtubs

Clean cut, traditional forms have a special appeal: and this is the case too with LAUFEN pro. Based on rectangular geometric forms, the design brings maximum functionality and a clean cut appearance to the bathroom. The acrylic bathtubs in the LAUFEN pro range are available in white or pergamon, in five sizes and also with whirl system.

LAUFEN offers as well matching steels bathtubs for the LAUFEN pro range. Please find these in the chapter "steel bathtubs and shower trays".

### Washbasin bowls

The original washbasin. What was once effectively a portable water container now provides elegant highlights in the bathroom. The washbasin bowl embodies a timeless chapter in bathroom history. More and more designers are now combining the light appearance of the washbasin bowl with suitable vanity units, which restores a great deal of authenticity to the bathroom.

### **Drop-in washbasins**

The ceramic basin is lowered from above into the cut-out in the washtop. In contrast to washbasin bowls, the underside is not ground flat, as the washbasin is not supported at the bottom. Bathrooms can be designed to individual requirements using a combination of washtops and bowls with a wide variety of forms and colours.

## talux

Design: Jürg Heuberger

With their geometric and pared-down, harmonious forms, talux washbasins are a refreshing move away from shortlived fashionable trends. Flat ceramic surfaces contrast harmoniously with the curves of the basins themselves. This is timeless elegance that is part and parcel of a modern lifestyle. Durability and functionality, efficient maintenance and an excellent priceperformance ratio also make talux the first choice for the municipal sector.

### talux

## **flora**kids

Design: platinumdesign, Andreas Dimitriadis

### Made with love!

Children love animals, and the more imaginative, colourful and friendly the better. We have succeeded in creating a child-friendly environment for early childhood hygiene. With its rounded shapes and strong colours, and taking inspiration from real life plants and animals, our bathroom reflects the typical playful and imaginative world of pre-school children. This product family is practical and adapted precisely to the needs of children.

Strong individual design with a kick: For Andreas Dimitriadis, a perfect product is one that does not just fulfil the expectations of the customers, but one that surprises them with its unexpected positive aspects as they use it. It is guided by the philosophy of the proprietor of the platinumdesign studio, together with his team of designers, CAD specialists and modellers, to develop strong individual designs that offer customers added value, that appeal to them emotionally and reflect the quality of the product visually, thus building up a strong brand trust.

Andreas Dimitriadis: "With florakids, LAUFEN has succeeded in creating a positive, lively and child-friendly environment for early childhood hygiene. This bathroom has been created exclusively for children!"

The florakids positive and playful washbasin is designed entirely with the needs of children in mind. Owing to its size, children can reach the faucets effortlessly. It can be used from all sides by more than one child at a time and its generous shelf surface leaves plenty of room for paintbrushes, beakers and toothpaste. Its round, corner-free forms also help prevent injuries. The washbasin is available in white, red and green. The colours have been fired on and are scratch-resistant, hard-wearing and non-toxic.

The rounded form of the curvepro faucets not only lends a playful touch, the powder-coated lever grip in red or green is easy for children to grip and use. The corresponding single-lever mixer with cartridge and fixed limitations allows, if defined and set by the customer, a lower water consumption and ensures scalding risk.

### florakids

# **pro**liberty

The barrier-free bathrooms transform comfort and practicality into good design and make an important contribution to independent living. LAUFEN pro liberty is a useful solution for hospitals, nursing homes and senior citizens' residences, as well as for private homes.

Its simplified lines make it a perfect match for the comprehensive range of LAUFEN pro baths and make standard-compliant use of the bathroom a much more comfortable experience. LAUFEN pro liberty conforms to DIN 18040 and SIA 521 500. The washbasin impressed the jury and customers at the Universal Design Awards 2011 and the Customer Favorites 2011.

### LAUFEN pro liberty

50

8

Ė

Ė

# libertyline/rehab

Barrier-free according to DIN standards and ÖNORM (Austrian Standards Institute). The 18024 and 18025 standards define the pre-conditions that bathrooms and toilets must fulfil in order to receive the "DIN barrier-free" certificate. The liberty line range has been awarded the "DIN barrier-free" standard and includes a wheelchair-compatible washbasin without overflow hole and with a concealed siphon. The WC, which must be at least 5 cm higher, has a projection of 70 cm and can be mounted as a wall-hung WC using existing connections. rehab is another wheelchair-compatible washbasin made by LAUFEN which is available without overflow hole.

### HiJet WC

HiJet is a new type of WC having highest-performance flushes with volumes of 4.5 and 6 litres. This unique model unites all worldwide standards. Maximum performance tests have shown that this powerful WC is prepared to meet future standards. It does already achieve outstanding flushing results with 2–3 litres, if the downstream drainage systems are designed for this purpose. LAUFEN has lodged a patent for this new flushing system.

### **Special articles**

The sanitary ware used in public buildings is subject to far more demanding requirements than its domestic counterpart. In hospitals, schools and public conveniences they need to work perfectly over long periods and thus have to fulfil very different requirements. LAUFEN calls the products it designs to fulfil these requirements "special articles". Particular special features, such as the clean lines they have on their upper surfaces and continuous overflow channel, give our robust sanitary ware exceptional hygiene, clear lines without nooks and crannies where germs can accumulate, and lasting quality.

### **Public urinals**

LAUFEN urinals for "public" sector can be seen in a wide variety of public places. Whether it be in the catering sector (restaurants, bars and hotels), busy transport nodes such as stations and airports, the business sector, municipal buildings such as schools and congress centres, or shopping centres, cinemas, theatres or concert halls – the scope of applications for these urinals, most of which are equipped with electronic flushing, is practically unlimited.

## antero

Eco-friendly urinal for prestigious washroom facilities: With its antero urinal designed LAUFEN offers outstanding design and meticulous well-conceived functions to create prestigious washroom facilities for guests, customers and staff. This masterly combination in the product design of the two qualities, form and function, the urinal has already earned the Red Dot Award 2012. The outstanding design has been developed by Toan Nguyen.

German Design Award SPECIAL MENTION 2014

LAUFEN urinals are set to revolutionise the upkeep and maintenance of public sanitary facilities. Up till now, urinals often had to be completely disassembled when replacing their siphons. antero and lema allow you to release the siphon easily using a special key and lift it out.

The siphon on antero und lema urinals can be changed easily, quickly and economically:

- 1. Remove ceramic cover by hand.
- 2. Lift siphon up and out using special key.
- 3. Clean urinal and rinse pipes.
- 4. Insert the new siphon.
- 5. Place ceramic cover.

### antero & lema control system

antero and lema urinals offer everything required by operators of public toilets: A thorough et water-saving flush, easy cleaning and maintenance and demandoriented control electronics.

The intelligent control system has different modes and can trigger cleaning after each user or at defined intervals with different flush quantities of between 0.5 and 3 litres. Following long periods of non-use, a hygiene flush takes place every 24 hours by default. An integrated overflow protection provides additional safety in the event of the outlet being clogged.

### Stadium mode

If usage frequency is high, the system automatically switches to stadium mode, which causes flushing to take place independently of usage. The system then triggers a flush at a programmable interval. If the system detects no usage within a flushing interval, it automatically switches back to normal mode.

### Hybrid mode

The urinal flushes at a predefined interval if usage is detected, and not after every single use. The flushing interval can be set to six different values between 1 h and 12 h. A predefined flushing volume is assigned to each flushing interval.

### **USB** module

In addition to user-friendly operation via a control panel, settings can be changed conveniently on a laptop using a USB connection. The clear interface of the control software also allows status functions and statistics to be queried.

### GLT module

With the help of an additional module, the LAUFEN control system has an interface to popular building control systems. This allows central flushing to be triggered and stopped, the flush quantity to be changed, and status queries to be made.

# Home urinals

The requirements are by no means the same for all applications which is why LAUFEN urinals are available for public and private uses. While urinals for the "public" area are designed to satisfy high installation and functional standards, urinals for the "home" area are impressive due to their high aesthetic standard. Urinals in the "home" area are ideal for private use. Their harmonious form gives your bathroom a very special atmosphere.

# **LIS Laufen Installation Systems**

The Laufen installation systems are the perfect solution to mount WCs of Laufen easily and quickly. Different dry-wall and brick-wall construction elements belong to the assortment tailored to help realize highly diverse building scenarios in main or guest bathrooms. All construction elements feature a cistern equipped with a dual flush of 6/3 Liter, that can be adjusted to 4.5/3 Liter. Two matching Laufen actuator plates, AW1 and AW2 Inox are available in a distinct simple and timeless design.

CW1

CW2

Wall-hung WCs can be mounted effectively and securely in dry-wall construction thanks to LIS. Only a minimum space width of 140 millimeter is required. In addition, a freestanding version is also available that does not require a supporting wall. A water saving cistern with dual flush is already built into the construction elements, the flush volume can be chosen from 6/3 to 4.5/3 Liter. A fixing kit as well as the connecting pipes are included in the scope of delivery, the version CW2 also comes with a connecting pipe needed for the shower toilet installation. Matching the modules, the actuator plates AW1 and AW2 lnox conclude the assortment.

#### TW1

TW2

LIS allows the installation of WCs with high-level cisterns on half-wall or brick wall constructions, requiring only 125 millimeter width of space. A water saving, dual flush cistern with 6/3 liter adjustable to 4.5/3 liter as well as the connecting pipe to the WC belong to the assortment. As compatible actuator plates AW1 or AW2 lnox can be chosen.

# **LIS Laufen Installation Systems**

AW1

AW2

With LIS LAUFEN provides a reliable construction system for dry-wall and brick-wall installation. Matching actuator plates in the best design tradition of LAUFEN are also available. All of them are designed for water-saving dual flush. The variant AW1 ce chosen with different surfaces, whereas the variant AW2 consists of extremely durable stainless steel and is therefore particularly suitable for public and semi-public sanitary rooms.

## **Universal cistern**

#### Elegant interface for WC

The floor-mounted LAUFEN Universal cistern is characterised by its rectangular geometric design and its high functionality. Its simple cuboid shape can be unobtrusively integrated into the spatial geometry of the bathroom, elegantly disguising the sanitary technology for the WC – the water connection, cistern and outlet are all fully hidden inside the ceramic housing. The minimalist design fully harmonises with the wide range of floormounted WCs offered by LAUFEN.

However, the Universal cistern not only has optical advantages. As an interface between the WC and the water supply and drainage installations, it also contains all standard connection options. It is thus eminently suitable for new constructions, renovation projects and bathroom conversions. Under normal circumstances, installation will not require any structural changes or interventions.

When installed by an expert, the WC will be back in operation within the shortest possible time – a customer-friendly solution when the conversion has to take place under normal operating

circumstances; a real alternative to conventional surfacemounted or concealed solutions.

When it comes to cleanliness and hygiene, the robust ceramic housing of the Universal cistern has many bathroom advantages.

The ceramic surface has no joints or recesses where dirt can collect. A moist cleaning cloth is usually sufficient for quick and easy cleaning of the smooth surface.

The LAUFEN Universal cistern is available with the dimensions 14x40x98 cm (DxWxH). The cistern and internal flushing mechanism make use of durable, water-saving Geberit technology. The flush mechanism is triggered by a two-volume flush button, which can be set to release water volumes of 6/3 litres or 4.5/3 litres. The Universal cistern fulfils the required standards for the USA (ASME A112.19.2 and A112.19.14), Australia (AS1172.2), Europe (EN14055 Class 1/Class 2) and Switzerland (592014-1).

# **Bathroom furniture**

It's hard to believe that we spend a large proportion of our lives in the bathroom. And for precisely this reason the bathroom, a place where we retreat to relax and take some time out of the daily grind to recharge our batteries, needs to have a special atmosphere. The harmonious bathroom furniture meets the highest aesthetic and functional standards – which means you savour those valuable moments in the bathroom all the more intensely.

# case

Compact, functional design is the main success factor in both collections. Case can be combined with many LAUFEN sanitary ware ranges. The rigorous straightforward forms bring out the best in any sanitary ware.

Timeless yet contemporary – case fits in almost any environment. The white scratch-resistant surfaces or contemporary wood structure surfaces of this continuously updated classic make it a compelling choice.

The case furniture range features a high-quality storage concept, suitable for combination with the living square range, among others – and which also represents extremely good value for money. Its ability to make the bathroom neat and tidy at all times is good for both mind and body. One of many technical refinements is the space-saving siphon which dispenses with the need to make siphon cut-outs which means all the space in the vanity unit can be used without restriction.

The case vanity unit, used here in combination with palace, can hold a great deal behind its soft closing doors and in its fully extendable drawers. Optional: one or two drawers.

Special details in a cubist form: The washbasins in the living city range are particularly suitable for flush integration of the furniture.

If you need more storage space in your bathroom, case cabinets offer the best value for money. There are two different versions available to help you stow your bathroom utensils tidily out of sight. The comfort features of the cabinets include surface-mounted handles and glass shelving.

Their exceptionally scratch, water and UV-resistant, easy-to-clean surfaces are available in three colours; white, chalked oak and anthracite oak – on request, we can deliver 38 other painted surface colours.

Wall mounting is simple and easy thanks to our flexibly adjustable 3D installation system.

# **Case** mirrors

Mirror with horizontal lighting.

Especially good illumination thanks to two vertical lamps.

The case mirror collection goes perfectly with LAUFEN furniture and washbasins. The mirrors in minimalist, timeless design are available in many different sizes and three different lighting schemes.

The mirror is backlit indirectly via the wall, giving the bathroom a relaxed atmosphere. At the front, lighting elements light up the face perfectly when applying make up or when shaving. The superb price-performance ratio of case mirrors makes them an attractive solution for both private and public projects.

# frame 25 Mirror cabinets

The timeless frame 25 mirror cabinet is a useful addition to a bathroom washbasin: Its continuous LED strips casts bright light, similar to daylight, on your face for applying make-up application or shaving and is a handy place to store accessories. High-quality details such as double-sided, mirrored, soft-closing doors, adjustable glass shelves and integrated sockets are all very impressive in day-to-day use. An optional accessory kit, consisting of a freely adjustable make-up mirror, a magnetic strip and storage cups for cosmetics provides even more convenience. Bottom ambient lighting is also available to cast mood lighting onto the washbasin.

# Wellness Bathtubs, shower trays, whirl systems

LAUFEN bathtubs and shower trays have been designed for people who see their home as a place to unwind and recover. From the classic bathtub through to models with complex whirl systems, the quality and workmanship is first class. The tubs are made of high-quality materials, from the best suppliers in the world. Almost all LAUFEN bathroom concepts have a suitable bathtub as part of their range, which comes in many shapes and forms. LAUFEN also offers many bathtub and shower tray solutions that are not associated with any particular design concept and can therefore be easily combined with existing sanitary wares.

# Solid surface bathtubs and shower trays

Bathing in a bathtub made of solid surface material feels like being in a natural basin. Due to a high percentage of mineral particles from nature, the surface feels smooth, like a rock which has been rounded and polished over years by gentle flowing water. The pleasant, warm touch of the surface gives a feeling of healthiness and cleanliness – and caters for maximum relaxation.

The innovative material also allows for an incredible freedom of design: almost every shape is feasible – from very organic, following nature's example, to very straight and architectural. Bathtubs made of solid surface are true design objects in every kind of bathroom.

Furthermore the non-porous surface of the material is hygienic, durable, UV-resistant, highly resistant to scratches and can be effortlessly cleaned – and therefore provides public buildings and private households with a long-lasting product, that is easy to maintain. Thanks to the characteristics of the material even small damages, like stains or scratches for example, can be cleaned easily or repaired invisibly. And of course, the solid surface material is non-toxic, which is essential for a material that handles water, our most valuable resource.

# Acrylic bathtubs and shower trays

- 1 PALOMBA COLLECTION freestanding bathtub
- 2 PALOMBA COLLECTION shower tray
- 3 LB3 floor even shower tray
- 4 ILBAGNOALESSI One freestanding bathtub

Because of their manifold qualities, bathtubs and shower trays made of sanitary acrylic have a decade-long tradition in the bathroom. All over the world, the material is highly appreciated for being smooth and comfortable to the skin. It's always a pleasure to take a bath or a shower and feel the warm touch of the material, which has excellent insulating properties too. Since the surface is very smooth, particles of dirt cannot get a grip or can be easily rinsed off – so well-being already starts when cleaning.

As contemporary bathrooms have to reflect the individuality and personality of their users, the sanitary acrylic bathtubs and shower trays from LAUFEN are available in many different shapes and sizes. They are made to fit into every bathroom scenario and ambience. Each and every one is a masterpiece of design and quality and can be equipped with panels for easier adjustment and maintenance.

Thanks to the shiny surface and the slenderness of the material the bathtubs and shower trays look quite elegant – even more, when the sanitary acrylic is integrally coloured and creates a harmonious ensemble with the colours of the ceramic objects in the bathroom. The necessary stability is provided by an optional aluminium frame accompanied by reinforcements of wood below the bottom and rim and a durable fibreglass lamination.

# laufen solutions

There should be no limits when it comes to feeling good which is why LAUFEN has a bath and shower range with the ideal format for any spatial situation.

Sometimes every centimetre counts in the bathroom. A hexagonal tub or shower tray which fits cleverly in the corner, for example, frees up more space.

This is why a wide range of shapes and sizes of shower tray are required in order to find an especially good solution for a particular spatial situation.

LAUFEN solutions is a high-quality set of tubs and trays. Our tubs and trays are made of the highest quality sanitary acrylic and have been carefully polished and quality-tested. LAUFEN solutions bathtubs also come with a variety of whirl systems.

# Whirl systems

Wellness at home: LAUFEN combines the rejuvenating energy of water, air and underwater lighting for reviving massages in your own bathtub at home. A feast for the senses – in total privacy. Underwater massage combines the life-giving power of water and air to lift your feeling of wellbeing. This is what LAUFEN promises to deliver with its top-quality bathtubs. LAUFEN whirl systems are available for all acrylic and solid surface bathtubs.

The unique LAUFEN air massage system, which features up to 90 air nozzles in the base of your bathtub, is exceptionally effective and comfortable. Thanks to the large number of apertures, the entire body is massaged evenly with ozone treated warm air which enters the water through air conduits under the floor of the tub. There are no metal nozzles which project beyond the base of the tub. The intensity of the air massage can be controlled seamlessly up to 100%. The air massage system is self-drying and therefore extremely hygienic and easy to maintain.

Unlike the air massage system, the water massage system uses water jets to achieve the desired massage effects. Depending on the model, your bath may feature between 10 and 14 massage water nozzles. There are water nozzles at the sides of the bathtub. To adjust the direction simply move the nozzle manually. Generally, it is not recommended to direct the nozzles perpendicular to the body but rather at a slight angle. The intensity of the water massage can be adjusted via the electronic control. To increase or decrease the diameter of the water jet simply turn the inner part of the jet clockwise or anti-clockwise.

Rotary micronozzles are installed in the back and foot areas of the bathtub and can be varied manually in intensity by turning the inner part of the nozzles. For more comfort these very flat nozzles pamper you with a relaxing feeling and soft massage.

# Whirl systems

Coloured lighting appeals to all senses. LAUFEN offers two different types of lighting: either underwater LED lamps illuminate the water or a LED strip in the overflow slot (used in Kartell by LAUFEN bathtubs) creates a relaxing atmosphere. Usually the colours of the LED lights change continuously, but one colour can also be selected via the sensor control system or remote control. The premium whirl systems (.695 .056 .057) feature a highly effective automatic disinfection system. In addition, they are equipped with a water heating system, which keeps your bath water temperature constant while the water massage function is in operation. This function is especially convenient, particularly for keeping the water warmer for longer in larger bathtubs.

## Electronic sensor control

	Air massage	Hydromassage	Disinfection	Heating	LED lamps	LED strips in overflow slot	Mist	Display	Music
Option 605	x								
Option 615					x				
Option 616						x			
Option 625	x				x				
Option 627						x	х		
Option 635		x							
Option 645	x	х							
Option 675	x	х			x				
Option 695	х	х	х		x				

The touch sensors for the whirl control system are recessed flush into the rim of the bathtub so they do not detract from the aesthetic appearance of the bathtub. This is not just simple and ingenious, it also enhances safety. Besides it is scratch-resistant, hygienic as well as easy to clean. Simply control your whirl system by softly touching the illuminated symbols on the rim of the bathtub.

## Remote control

	Air massage	Hydromassage	Disinfection	Heating	LED lamps	LED strips in overflow slot	Mist	Display	Music
Option 056	x	x	х	х	х			х	х
Option 057	x	x	x	х	х		х	х	х

With the remote control system, LAUFEN ensures additional comfort in its top-of-the-range bathtubs. The waterproof casing of a media player has a sophisticated design and conceals state-of-the-art technology: As well as the whirl system control, the equipment also includes an MP3 player, a radio and an amplifier which is integrated into the tub.

The straightforward user guidance with control buttons and screen gives the user full access to all functions of the whirl system who can, for example, run predefined relaxation programs which combine wellness applications and music, and also create customised programs.

The remote controlled music functions can both be seen and heard: The integrated MP3 player has 2 GB of memory for

favourite tracks, which can be played via headphones or a powerful 4.1 sound system with four 30 watt loudspeakers and a 100 watt subwoofer.

Music can also be played by external devices either wirelessly via a Bluetooth 2.0 connection or via USB cable. A practical function when relaxing in the bath: A quick-selection button provides instant access to your music collection or radio. There is also a new function that controls a chrome-plated, LED-lit outlet, which spreads a mist over the surface of the water. The remote control can swim on the surface of the water and is kept on the rim of the bathtub, where hidden magnets hold it firmly in place.

When ordering whirl systems, LAUFEN always recommends to order bathtubs with acrylic panels or to install removable tiled drywalls for easier access in case of maintenance. If you can't avoid bricking in the bathtub, please plan large inspection chambers of minimum size 50x50 cm so that technical parts remain accessible. The installation of an additional ventilation grill is compulsory.

# Steel bathtubs and shower trays

There are few things in life that will last a lifetime. Bathtubs and shower trays of LAUFEN are produced using heavy 3 and 3.5 millimetres enamelled steel, which is extremely durable and dimensionally stable, as well as resistant to scratching, impacts and abrasion. As steel is a good conductor of heat, you will immediately have a warm, pleasant feeling, when your skin touches the surface.

Shower trays and bathtubs made of enamelled steel are very easy to clean - the non-porous surface gives dirt and bacteria less chance to adhere. In addition, the smooth glass finish that covers the steel is resistant to acidic cleaning agents. That's hygiene made easy! To give a free hand for planning, the bathtubs and shower trays are available in many different heights and sizes. In addition, LAUFEN paid special attention that the available colours match perfectly with the colours of the ceramics in your bathroom - because relaxation starts with the visual impression. For maximum convenience, several shower trays can be installed floor even to avoid stumbling hazards and both the bathtubs and shower trays are equipped with an anti-slip coating. Furthermore there is a bunch of accessories like handles or gel pillows to increase your comfort while taking a bath or a shower - and an optional structural sound insulation system that ensures that you are not disturbed in doing so.

# **Ceramic shower trays**

There are many good reasons to choose a shower tray made of sanitary ceramics: They are characterized by their long life and tangible quality. They are very hygienic and resistant against fungi and bacteria due to their glazing. And the material they are made of is 100 percent natural and completely recyclable.

The ceramic shower trays of LAUFEN are available in square, rectangular and corner versions and in different sizes. They fit harmoniously into your bathroom and give it a quite natural and human touch. Each and every one is a masterpiece of its own, thanks to the immense know-how and intense passion that are handed down from generation to generation at LAUFEN.

Our attractive shower trays offer a conveniently low step-in height and can be supplied with an anti-slip coating, if desired. The anti-slip coating has been tested according to the German industrial standard DIN 51097 and offers a higher than average anti-slip performance. Because it is applied prior to glazing and firing, it integrates durably into the ceramic structure. This refined surface offers a perfectly secure grip and is easy to clean, resistant to acids and scratch-resistant.

The design language of curve discreetly reconciles naturalness with fantasy. Soft organic contours blend into bathroom settings fluidly, lending the scene a sense of lightness and elegance.

### TWIN

### CITY

# cityprime

Twin is bold, logical and cool. Extremely slim and highly precise, it makes for an excellent component of modern, puristic architecture. Twin is ideal for people looking for a timeless and functional design which makes no compromises.

City epitomises the union of puristically flat design features and horizontal proportions. Modern and trendy, it is loved by everyone with a liking for the extraordinary and for top quality.

# **curve**prime

Water for the senses: The defining characteristic of curveprime is its elegant bow-shaped outlet, a sensuous interpretation of the flow of water. This comes with a stream shaper as a single-lever mixing unit, dual-handle faucet or three-hole version.

The bathtub faucets in the curveprime range radiate perfection and dynamism. Whether you choose the version for the wall or bath rim – the ranges are comprehensive, and even have a matching handspray.

# **city**prime

The systematic design of the Lb3 faucet series is the full works – all three design versions look incredibly good: from one-hole to three-hole through to bathtub rim and bath and shower mixers. The range also includes handsprays and showerhead holders. Summary: A timeless design with innovative technology; the Ecototal technology in the mixing system facilitates a particularly energy and water saving approach when handling the valuable commodity, water.

Clarity is a matter of form, unmistakable and timeless. It always works well, everywhere – and in particular where clear-cut design is called for. Smooth surfaces joined together in a squareedged fashion; this is how this faucet crowns the washbasin, shower or bathtub. quadriga – uncompromisingly honest.

# tronic

## tronic - electronic operating concept

The tronic electronic operating concept offers an interesting alternative to traditional tap-based control systems which use handles and levers. This innovative concept is based on electronic controls and makes for even more comfort and hygiene. As the operating unit can be placed anywhere, this opens up new aesthetic and ergonomic furnishing solutions for planners and users.

# **curve**tronic

curvetronic brings a breath of fresh design to public and semipublic areas. The contactless infrared-controlled water tap upgrades any bathroom . curvetronic fulfils the highest hygiene requirements thanks to a shape that is easy to clean and to its contactless operation. It also saves up to 70% water compared to other water taps with operating levers.

The integrated, high-quality curvetronic electronics offer numerous functional options that can be adjusted to meet individual needs. The water tap can be operated either by battery or a mains connection. Simple maintenance is also ensured: The curved spout has a removable cover that provides quick and easy access to the integrated technical system without having to remove the fitting.

reddot award 2014

The water flow starts as soon as your hands enter the detection area.

## Infrared controllers - flexible technology for all needs

- Intelligent concept. Contactless operation for increased hygiene and convenience.
- Has a long service life and saves energy. Vandal-proof design and efficient components ensure a long service life.
- Maximum convenience. The high-quality electronics facilitate numerous functional options.
- Simple energy supply. Mains socket or battery - energy-saving electronics make all the difference.
- Superior infra-red technology. The water flows and stops automatically, controlled by an electronic sensor.

# **twin**tronic

The twintronic concealed solution facilitates particularly spacesaving design for public washrooms. Twintronic can be installed with the Simibox Standard & Simibox Light concealed system.

## Infrared controllers - flexible technology for all needs

The future of water taps: contactless, hygienic, vandal-proof and economical. Infra-red technology can save up to 70% water compared to conventional water taps and the easy-toclean shape makes it very hygienic.

Ideal for public and semi-public installation: Low consumption and maintenance costs even during maximum use.

Ideal for hospitals, sport arenas, schools, airports, railway stations, gyms and restaurants.

Supplementary stopper for the installation of concealed washbasin mixer with IR sensor - to be ordered together with every twintronic model.

# **Simibox** Three boxes, many advantages

The concealed Simibox system combines ingenious technology and easy handling with high design standards. Choose the Simibox Standard with integrated stop valves and reversible supply and outlet pipes or one of the simpler Simibox Light versions, depending on the local conditions.

Simibox Light with stop valves 37898.0.000.100.1

Simibox Light without stop valves 37898.0.000.101.1

Simibox Standard with stop valves Supply and outlet pipes reversible 37898.0.000.000.1

Pre-assembled set with functional unit and decorative finish

## Integrated stop valves

Just turn two screws and the water stops. The local stop valves facilitates any necessary service quickly and easily without having to turn off the water in the entire building.

Simple positional correction after installation by up to 5°

If the box is not installed exactly level, the functional box of the Simibox Standard can later be adjusted by 5° on both sides.

Flexible The connections for the supply lines and mixed water outlets can easily be reversed on the Simibox Standard.

# **Simibox** Concealed system for all design ranges

Cutting-edge technology behind the wall means nothing without attractive packaging to round it off. The high-quality design of our concealed mixer perfectly complements the shower and bath experience. The pre-assembled kit is made up of the functional unit, together with the corresponding decorative elements, and is available to match all our design ranges. If new forms are required, a replacement is possible in next to no time. Whether you are looking for classical elegance, futuristic boldness or everyday simplicity – LAUFEN concealed mixers have something for every taste.

# **Ceramic shelves and accessories**

It is not always easy to find what you want: High-quality ceramic accessories. Whether under-mirror shelves in a variety of sizes, toilet paper holders or toilet brush holders, our high-quality products bestow elegance and lend a certain majesty to your bathroom. In addition, these elegant accessories are practically indestructible and particularly easy to clean. As well as all that, practical ceramic tableaus provide easy-to-clean shelving under your washbasin.

# Ceramic shelves and accessories

# Product features and benefits: Sanitary ware

Sanitary ware production: Tradition and innovation

The basic ingredients for making ceramics have always been naturally occurring raw materials: Kaolinite, clay, feldspar and quartz sand form the basis for this extremely durable and hard material. The individual components of this malleable material are combined, homogenised and cleaned as part of a unique and very protracted process at LAUFEN. The resulting slurry – the pourable starting material for ceramics – is poured into pre-prepared plaster moulds or shaped using a special pouring process developed at LAUFEN.

The formability and pourability of the material allows the creation of a wide variety of sanitary ware products, but nevertheless always poses a manufacturing challenge, especially when creating objects with complex geometries. Dried and glazed blanks are then baked in a kiln at temperatures up to 1240°C. Such extreme kiln temperatures ensure the hardness and durability of our high-quality LAUFEN products.

Ceramics, through their smooth, easy-to-clean surface, fulfil the highest hygiene standards – chemical acids, strong cleaning fluids or hydrochloric compounds hardly affect the material. Due its light fastness, versatility and pleasant appearance, ceramic is the most popular material used to manufacture high-quality sanitary fittings.

**Top recycling qualities:** Ceramic is the oldest malleable material used by mankind – and consists exclusively of naturally occurring raw materials. Ceramic is 100% recyclable and can be reintroduced into production processes as a ground powder or reused as a valuable raw material in other industries.

SaphirKeramik

Ceramics or synthetic materials: Ceramic is the material which has been traditionally used in the bathroom over the centuries - and with good reason. The superiority of the material is evident, particularly in terms of hygiene, useful lifetime, environmental compatibility and durability. However, washbasins made of plastics and mineral-based cast materials are also available on the market, which present a design challenge to producers of sanitary ware. LAUFEN has always had a reputation as an innovator in the sanitary sector and is always striving to improve the materials and production techniques it uses. As a result of these efforts, new ceramic compositions have been developed that allow smaller tolerances and even more precise corner radii or large flat ceramic items. Made to measure washbasin solutions ensure that ceramic sanitary ware can be fitted with millimetre precision into bathroom floor plans. Ceramics therefore deliver outstanding performance in all respects.

## A revolution in the formal language of ceramics:

The innovative and high-quality composition of SaphirKeramik bestows possibilities and versatility never seen before upon the base material, enabling exceptional shaping. Edge radii of 1–2 mm are thus technically feasible.

The new type of ceramic is considerably harder and has an improved bending strength. LAUFEN is thus able to produce thinner ceramic bodies, which reduces weight and the consumption of raw materials and energy. SaphirKeramik is not a replacement for any of the existing materials; instead, it broadens the range of forms of expression of the natural base material.

🖈 SaphirKeramik

## Product features and benefits: Sanitary ware

LCC stands for Laufen Clean Coat. This innovative ceramic surface finish is a vitreous silicate ceramic coating which is fired on top of the original glaze. LCC is an extremely hard, indeed almost indestructible indivisible part of the ceramic object to which it is applied. The benefits of this process: With a roughness of only 4 nanometers, LCC is entirely free of pores. Thanks to this feature, lime, dirt and bacteria have practically nowhere to gain a foothold – and even if they do, they can be removed much more easily. A hydrophilic effect caused by the material ensures that dirt particles are more easily washed away on flushing. In addition, cleaning and disinfection fluids spread over the surface more easily and thus work more effectively. This is an ideal solution for the rigorous demands of everyday cleaning - for example in hotels or clinics - as LCC also means the sanitary ware is highly resistant to aggressive cleaning agents and chemicals. LCC ensures the highest standard of cleanliness and hygiene in the long-term. Even after years of use, the sanitary ware remains smooth and shiny, just as it was when it was brand new, in private bathrooms and public and semi-public areas.

Our **concealed ceramic overflow system,** the alternative to standard overflows for washbasins and bidets, has many benefits. Thanks to our overflow system which is invisible from the outside, our washbasins and bidets no longer have a visible overflow hole, which not only improves the appearance of the product, it also makes cleaning much easier. This hygienic and aesthetic innovation is very simple: water rises in a concealed internal channel in parallel with the water inside the washbasin, and overflows into the run-off when the water reaches the maximum level. Another attractive detail of LAUFEN washbasins is the ceramic cover on the pop-up waste, which is available in

a variety of glazes. These covers are available with a wide range of pop-up waste versions for many washbasins and bidets (e.g. the ILBAGNOALESSI One and the dOt, PALOMBA COLLECTION, Lb3, and others).

LAUFEN is breaking the mould when it comes to **drain design**. The new washbasins in the Kartell by LAUFEN range have no visible drainage opening. The water disappears into a narrow, hidden drain through an elegant pipe. A concealed overflow system has also been developed. A special valve allows you to choose between a solution which is always open or which can be closed off.

**LAUFEN EasyFit:** LAUFEN has developed a revolutionary wall fixation system for WCs, bidets and urinals. A patent has been lodged. The invisible, easy to mount fixation system meets the needs of both fitters and end users. For example, end users are impressed by a ceramic WC with a flawless surface which is really easy to clean since there's nowhere for dirt to hide. Fitters are enthusiastic about the time-saving, intuitive mounting system.

Thanks to our convenient **lowering system** many of our WC covers and seats close gently and quietly. For easier cleaning, all LAUFEN seats can be removed with a simple hand movement.

LAUFEN seats have been comprehensively tested: amongst others the test includes opening and closing 50,000 times.

# Product features and benefits: Sanitary ware

The installation dimensions of WCs are not always identical: In many renovation situations the LAUFEN **Vario outlet** can make it easier to connect the WC to the sewage network. Both horizontal and vertical outlet wall clearances of up to 305 mm for washdown are possible.

Maximum wall clearance for vertical floor outlet

Minimum wall clearance for vertic wal floor outlet

Horizontal wall outlet

The latest generation of **LAUFEN water-saving WCs** are optimised to a full flushing volume of 4.5 litres of water. Compared to today's 6/3 litre dual flush these models provide substantial water savings. With an average of 5,000 flushes per WC per year, the yearly water saving is at least 6,000 litres, or more than 27,000 litres if we take into consideration that 9 or even 12 litremodels are still in use. LAUFEN WCs marked with the green 4.5/3L logo are not only fulfilling the requirements defined in the harmonized standard EN 997 Class 1 Type 5 and Class 2 (that cover the whole European territory), but also fulfill the challenging Australian requirements of SAI/Wels 4 Stars.

For Laufen the European water label is the most reliable and transparent way for consumers and professionals to clearly appreciate the potential regarding the reduction of water consumption. LAUFEN toilets, cisterns and urinals are developed to reach the highest level of water saving performance. Please note that a suitable downstream drainage system must be built for this kind of water-saving WCs. In case of restrictions of the existing drainage system or local regulations LAUFEN WCs marked with green 4.5/3L logo can also be flushed with standard 6 litre flushing volume.

The bowl of the new **LAUFEN pro rimless WC** has no rim. There's no longer anywhere for dirt and deposits to hide; instead, thanks to an innovative and powerful flushing system, everything's flushed cleanly away with both the 6/3-litre version and the 4.5/3 litre version. Both public toilets and private bathrooms can benefit from the easy cleaning and great hygiene of this system.

**HiJet WC:** A new type of WC having highest-performance flushes with volumes of 4.5 and 6 litres. This unique model unites all worldwide standards. Maximum performance tests have shown that this powerful WC is prepared to meet future standards. It does already achieve outstanding flushing results with 2–3 litres, if the downstream drainage systems are designed for this purpose. LAUFEN has lodged a patent for this new flushing system.

The **intelligent control system** has different modes and can trigger cleaning after each user or at defined intervals with different flush quantities of between 0.5 and 3 litres. Following long periods of non-use, a hygiene flush takes place every 24 hours by default. There is also an integrated overflow protection function in case the drain hole becomes blocked.

## Hybrid mode

The urinal flushes at a predefined interval if usage is detected, and not after every single use. The flushing interval can be set to six different values between 1 h and 12 h. A predefined flushing volume is assigned to each flushing interval.

The **LAUFEN lema** 0-litre urinal saves water and money. It operates without water and does not require a water shutoff device or electricity to keep the drain closed. The urine itself helps to keep gases sealed in and to prevent their escape. The principle behind this "trap" is known in the chemical industry as the Erlenmeyer flask.

## Product features and benefits: Sanitary ware

The bathroom is private. So that it stays that way, LAUFEN provides **sound insulation sets**, consisting of specialised foam and rubber elements for its washbasins and wall-mounted WCs. These elements considerably reduce the amount of noise due to usage and functions that passes through the wall into neighbouring rooms.

Depending on the structural situation, a sound reduction of up to 9 decibels can be achieved, which means that noise is reduced by almost half.

These sets have been tested against SIA 181 and DIN 4109 and certified by Fraunhofer.

89269.1 sound insulation set for washbasins up to 80 cm 89269.2 sound insulation set for washbasins of 80–100 cm 89269.3 sound insulation set for washbasins of 110–180 cm 89269.4 sound insulation set for WC

**Made-to-measure sanitary ware:** Many large LAUFEN washbasins can be manufactured made-to-measure at the factory. Using this innovative production technology, we can manufacture sanitary ware to fit the plan of your bathroom. On the one hand, the ceramic can be cut to size – even on the diagonal. On the other, even freestanding side elements can be custom made without any visible side panel attachments.

## **Product features and benefits: Wellness**

When choosing the **bathtub material** the choice depends individual preference and intended use. In order to be able to provide the right solution for all situations, LAUFEN provides three different bathtub materials:

#### Solid surface bathtubs and shower trays:

Bathing in a bathtub made of solid surface material feels like being in a natural basin. Due to a high percentage of mineral particles, the surface feels smooth. The innovative material also allows an incredible freedom of design: almost every shape is feasible – from very organic to very straight and architectural.

Furthermore the non-porous surface of the material is hygienic, durable, UV-resistant, highly resistant to scratches and can be effortlessly cleaned.

#### Acrylic bathtubs and shower trays:

Bathtubs and shower trays made of sanitary acrylic have benefits due to the insulating properties of the material and its warm surface. Together with an underlay made of hard foam, the material helps your bath water retain its temperature for a long time. LAUFEN sanitary acrylic is integrally coloured, is light and colour fast and easy to clean.

#### Steel bathtubs and shower trays:

Bathtubs and shower trays in enamelled steel are hygienic, and resistant to acid, scratching, impacts and abrasion. LAUFEN steel bathtubs are produced using heavy 3 and 3.5 mm enamelled steel; they are extremely dimensionally stable and come with an anti-slip coating. In addition, they are fitted with a sound insulation system.

#### Ceramic shower trays:

Modern shower trays made of sanitary ceramics can fit harmoniously into your bathroom. Like any of the LAUFEN ceramic products, they are characterised by their especially long life and tangible high-quality. Our attractive shower trays offer a conveniently low step-in height and can be supplied with an antislip coating, if required.

**Whirlpool** – Wellness at home: LAUFEN combines the rejuvenating energy of water, air and underwater lighting for reviving massages in your own bathtub at home. A feast for the senses – in total privacy.

2

#### Air nozzles (1):

Up to 90 nozzles positioned in the bathtub floor effectively revive your body all over. The outlets are installed flush with the bathtub floor and therefore do not impede enjoyment of the whirlpool. The warm and tingling ozonised air is blown into the water via air conduits under the base of the tub. The system is self-drying and therefore hygienic and easy to maintain.

#### Water nozzles (2):

Depending on the model, LAUFEN whirlpools are equipped with between 4 and 8 water massage nozzles. Water nozzles are installed at the sides, the direction and power of which can be individually adjusted. A number of adjustable rotating microjets are used in the back area, and relaxing massage jets are used at the feet.

When ordering whirl systems, LAUFEN always recommends to order bathtubs with acrylic panels or to install removable tiled drywalls for easier access in case of maintenance. If you can't avoid bricking in the bathtub, please plan large inspection chambers of minimum size 50 x 50 cm so that technical parts remain accessible. The installation of an additional ventilation grill is compulsory.

## **Product features and benefits: Wellness**

**Coloured lighting** appeals to all senses. LAUFEN offers two different types of lighting: either underwater LED lamps illuminate the water or a LED strip in the overflow slot (used in Kartell by LAUFEN bathtubs) creates a relaxing atmosphere. Usually the colours of the LED lights change continuously, but one colour can also be selected via the sensor control system or remote control.

The LAUFEN **wellness remote control** is installed our top whirlpool models and ensures maximum comfort. The waterproof casing of a media player has a sophisticated design and conceals state-of-the-art technology: As well as controlling the whirl system, the system also includes an MP3 player, a builtin radio and an amplifier with a powerful 4.1 Surround Sound system. Naturally, the remote control system also contains preset whirl functions specific wellness requirements. The remote control is kept on the rim of the bathtub, where hidden magnets hold it firmly in place.

The wellness functions of the LAUFEN whirlpool can also be controlled by **touch-sensitive areas** on the bathtub rim: The system is safe, scratch-resistant, hygienic and easy to clean – and does not detract from the aesthetic of the bathtub.

Many of LAUFEN bathtubs are available with precise-fitting sanitary acrylic skirting for a variety of installation situations. These **acrylic panels** are secured quickly and easily using a magnetic mounting system and are an alternative to labour-intensive bricking in of the tub. These panels are made of the same high-quality and easy-to-clean acrylic as the tubs and allow easy access to the plumbing under the tub for maintenance purposes.

A bathroom that is proper installed and perfectly arranged helps to achieve a balanced and harmonic atmosphere. That's why LAUFEN offers a suitable **styrofoam carrier** for each drop-in bathtub (except the ones with whirl system). These carriers simplify the mounting of the bathtub enormously: mounting is quicker and cleaner, because there is no bricking necessary, and tiling is also much easier on the perfectly accurate surface of these unseen helpers.

The LAUFEN **installation kit** made of hard foam allows a wide range of shower trays to be installed flush with the floor – and also assists with sound and heat insulation. A protective peripheral strip securely permanently prevents water from entering between the tiles and tray.

LAUFEN **sound insulation sets** for bathtubs and shower trays significantly reduce the transmission of sound to neighbouring rooms and ensure a private, undisturbed bathing experience – without disturbing the neighbours. Irrespective of the structural conditions, a sound reduction of 10 or even 16 decibels can be achieved. Even a 10-decibel reduction corresponds to a 50% reduction in audible noise. LAUFEN sound insulation sets are tested against SIA 181 and DIN 4109 and are certified by Frauenhofer.

LAUFEN bathtubs and shower trays conform to applicable European standards and are tested and monitored on-site by the independent testing institute LGA Quali Test GmbH.

**Antislip** is a surface treatment which is applied to glazed and enamelled surfaces and then fired on and is thus optimally integrated into the surface structure. The surface offers a secure grip and is also easy to clean, and resistant to acids and scratching.

Antislip has been tested against the German industrial standard DIN 51097 and offers higher than average antislip performance. With or without antislip, LAUFEN shower trays feel comfortable on the skin.

## **Product features and benefits: Furniture, lights and mirrors**

**Furniture surfaces** in the bathroom are designed to deal with the room's special climate conditions. LAUFEN provides a range of different surfaces, all optimised for their intended use and come with a guaranteed long useful life.

#### Real wood veneer:

A cosy bathroom in wood. The classy wood veneers provide the haptics and optics of real wood. They are resistant to moisture and equipped with reinforced edges, making them resistant to impacts. These real wood veneers include those used in Lb3 and ILBAGNOALESSI One 'noce canaletto'.

#### Painted furniture surfaces:

Our classic high-gloss paint finish, using two-component water-resistant paints, offers perfect surfaces with no unevenness and a wide range of colours. LAUFEN painted surfaces include the ILBAGNOALESSI One white furniture and LAUFEN also offers 38 additional special paints (shown on right) for the case and LAUFEN pro furniture ranges.

#### Film coatings:

Film coatings are pulled over corners, thus ensuring the furniture surfaces are joint-free and not sensitive to water. They are scratch, water and light-resistant. Their flexibility offers a great deal of design freedom in terms of the forms used, such as integrated handles, for example. LAUFEN uses film coatings in its LAUFEN pro, moderna plus and case ranges.

**Tidy storage systems** in drawers of the ILBAGNOALESSI One bathroom furniture range ensure tidy storage and prevent the return of chaos every time a drawer is closed fast.

Slamming of doors is not inevitable: At LAUFEN, **soft close** means gently-closing furniture doors and drawers. The system is integrated as standard into all LAUFEN furniture. In this case, quality can be felt and not heard.

Comfort in every detail: The flexible and adjustable **3D mounting system** makes installation LAUFEN furniture on the wall quick and easy.

LAUFEN undercounter furniture is exclusively equipped with an innovative **space-saving siphon** (1). This dispenses with the need for siphon cut-outs in the drawers (2), reclaims valuable storage space and ensures unlimited use of internal space.

## **Product features and benefits: Furniture, lights and mirrors**

**Light in the bathroom** – for bathing in light: With illuminated mirrors and mirror cabinets, LAUFEN offers a wide range of individual lighting solutions. From integrated LED lighting (1), to fitted lamps (4), to glass-edge lighting (3) in the cabinet shelving, from indirect atmospheric lighting (2) which lights up the entire room to optimum useful light directly in front of the mirror for applying make up or shaving.

2

As an option for the case mirrors, LAUFEN offers an integrated contactfree **sensor switch** for mirror lighting. This means you can switch the light on by putting your hand near the mirror, without having to touch the mirror at all.

#### The lighting elements

used in LAUFEN illuminated mirrors in the case range can be replaced very easily and quickly. The mirrors can remain on the wall during this process. As is the case with all electrical equipment in the bathroom furniture – they are protected from all directions against splash water and dust according to protection class IP 44.

## **Product features and benefits: Faucets**

Saving water and energy without compromising comfort – this is the speciality of the **Ecototal** and **Ecototal**+ energy-saving technologies used in LAUFEN faucets. The ceramic control cartridges within the faucets contain flow and temperature brakes – in order to draw off the full quantity of water or really hot water, a certain resistance must be overcome when opening the tap. Using this LAUFEN technology, up to a third of energy and water consumption can be saved without compromising comfort. **Ecototal**+ also provides an intuitive energy-saving function which is ideal for public sanitary facilities: When the lever is in the centre position, only cold water and not mixed water is drawn off – which is often sufficient when washing hands.

With the **tronic** electronic operating concept, LAUFEN offers an interesting alternative to traditional tap-based control systems which use handles and levers. The innovative concept is based on an electronic control system. The design of the twinprime tronic control panel for bathtubs and showers features purely geometric shapes. The material combination of glass and chrome gives it a high-quality, elegant appearance.

LAUFEN **rain shower heads** are impressive during dayto-day operation, not least due to their appearance, but also because of their functional features: After the water is turned off, they do not drip and therefore remain virtually free of lime deposits, as water from the nozzles does not spray against the shower head.

They are available in three different shapes – square, rectangular and oval.

Behind-wall installation

The **Simibox** is a practical universal concealed mounting unit by LAUFEN. Apart from allowing easy and secure installation of faucets, it also allows the concealed mixer to be inspected later on – without having to shut off the main stop valves. The Simibox is suitable for any building project. The installation process remains largely the same no matter what construction method is being used. Consisting of a rough-in set and pre-assembled set, it also allows the faucets to be replaced at any time without having to open the walls. During the building process the top-end faucets are installed only as the last step after all other building workers have left, to preserve their surface finish.

Depending on local conditions, you can choose between the **Simibox Standard** with integrated stop valve and inlet/outlet reversibility or one of the simplified **Simibox Light** variants with a low recess depth of just 74 mm.

## **Overview of ceramic options**

#### **Options for washbasins**

one tap noie, centre
one tap hole, left
one tap hole, right

one tan hole centre

.107 two tap holes

104

- .108 three tap holes
- .109 without tap hole
- .111 one tap hole, without overflow hole
- .112 without tap hole, without overflow hole
- .113 one tap hole, left, without overflow hole
- .114 one tap hole, right, without overflow hole
- .115 two tap holes, without overflow hole
- .134 one tap hole, with decor on the ceramic shelf
- .135 one tap hole, cutable on one side
- **.136** three tap holes US/CAN, 8 inches apart
- **.138** three tap holes, with decor on the ceramic shelf
- **.139** without tap hole, with decor on the ceramic shelf
- .141 three tap holes US/CAN 8 inches apart, with decor on the ceramic shelf
- .142 without tap hole, without overflow hole, without open drain
- .146 without tap hole, without overflow hole, cutable on two sides
- .147 one tap hole, cutable on two sides
- .149 without tap hole, cutable on two sides
- .150 three tap holes, cutable on one side
- **.151** three tap holes, cutable on two sides
- .155 outer surface glazed
- .156 one tap hole, without overflow hole, without open drain
- **.158** three tap holes, without overflow hole
- .159 without tap hole, cutable on one side

- .804 one tap hole, one hole on left for soap dispenser.805 one tap hole, one hole on right
- for soap dispenser
- .806 one tap hole, one hole on left and right side for soap dispenser
- .807 two tap holes, 400 mm apart, one hole on right and left side for soap dispenser
- .808 three tap holes, one hole on left for soap dispenser
- .809 three tap holes, one hole on right for soap dispenser
- **.810** three tap holes, one hole on right and left side for soap dispenser
- **.814** one tap hole, one hole on right for electronic control valve
- .815 one tap hole, one hole on right for electronic control valve, without overflow
- .816 one tap hole, one hole on left for electronic control valve, without overflow
- .817 one tap hole, one hole on right for soap dispenser, without over-flow
- .818 = .806, but without overflow hole
- .819 = .807, but without overflow hole
- .820 = .808, but without overflow hole
- .821 = .809, but without overflow hole
- .823 = .810, without overflow hole
- .850 one tap hole, without overflow, cutable on one side
- .851 three tap holes, without overflow, cutable on one side
- .852 without tap hole, without overflow hole, cutable on one side
- .853 one tap hole, without overflow hole, cutable on two sides
- .854 three tap holes, without overflow hole, cutable on two sides
- .855 two tap holes, with overflow hole, cutable on one side
- .856 two tap holes, without overflow hole, cutable on one side
- .857 two tap holes, with overflow, cutable on two sides
- .858 two tap holes, without overflow, cutable on two sides

#### **Options for bidets**

- .302 with one tap hole at centre, without lateral holes for water inlet
- .304 with one tap hole at centre, with lateral holes for water inlet
- .308 with three tap holes, without lateral holes for water inlet

#### Tap hole symbols

- O = without tap hole
- = one tap hole
- e = two tap holes
- $\bullet \bullet \bullet$  = three tap holes

It is possible that not all products, sizes or colours are available in every country. The price list of your LAUFEN/ROCA subsidiary is the most accurate reference point for product availability. Delivery periods may also differ. The colours shown may not be absolutely identical to the actual colours. The bathroom environments shown here are simply decorative settings and do not take all technical requirements into consideration. The decoration schemes shown are not included in our range of products.
